## Relieve After Shave Tonic

CATEGORY: SKIN CARE

### INGREDIENTS

Phase	Ingredient	INCI	Supplier	Weight (%)
A	Deionised Water	Aqua	-	Up to 100
	1,3-Butylene Glycol	1,3-Butylene Glycol	OXEA	1.5
	Neolone® PH Max	Phenoxyethanol, Pelargonic Acid	LANXESS	0.9
	Glycerin	Glycerin	OQEMA	2
	Antarctic-G	PseudozymaAntarctica Ferment Extract, Pseudoalteromonas Ferment Extract, Water, 1,2-Hexanediol	LABIO	3
B	SABOSOL RF MB	Coco-Glucoside, Squalane, Sodium Surfactin	SABO	5
	Erythcalm® SC	Caprylic/Capric Triglyceride, Saururus Chinensis Extract	JAKA	3
C	Lactic acid	Lactic Acid	OQEMA	q.s.

## METHOD

---

1. Mix Phase A and B separately.
2. Slowly add Phase B to Phase A while stirring.
3. Adjust the pH to 5.0-5.5 using Phase C.

## APPEARANCE

---

Transparent, slightly yellow liquid.

## HIGHLIGHTS

---

The synergy of Antarctic-G, which helps improve skin tone, and Erythcalm® SC, which soothes redness and irritation, makes this formula ideal for an after-shave treatment. SABOSOL RF MB acts as a multifunctional solubilizer, providing hydration and enhancing skin comfort for a smooth, refreshed feel.
