| | SmartLipids Ceramides plus | Aqua, Caprylic/Capric Triglyceride, Ceramide NP, Sodium Stearoyl Glutamate, Ceramide AP, Pentylene Glycol, Phytosterols, Stearic Acid, Oleic acid, Palmitic Acid, Caprylyl Glycol, Propanediol, Glyceryl Caprylate | Berg+Schmidt | 5 |
| D | Lactic acid | Lactic Acid | OQEMA | q.s. |

METHOD

1. Mix Phase A and B separately.
2. Heat both Phases to 85°C.
3. Slowly add Phase B to Phase A while homogenizing.
4. Homogenize for further 10 min.
5. Cool while stirring.
6. Add Phase C when under 40 °C
7. Adjust the pH to 5.0-5.5 using Phase D.

APPEARANCE

Textured cream, with non-sticky matt finish.

HIGHLIGHTS

BergaCare SmartLipids Ceramide Plus care by strengthening the skin's barrier and helping to lock in moisture. The advanced encapsulation technology protects and stabilises the ceramides, ensuring their full effectiveness. Complemented by BENTONE® HYDROLUXE 360, the formula glides on effortlessly, leaving a soft, matte finish for skin.
