METHOD

1. Mix Phase A.
2. Adjust the pH to 5.0-5.5 using Phase B.

APPEARANCE

Transparent liquid.

HIGHLIGHTS

Powered by Oralitos PE, a natural extract rich in phenols and flavonoids, the formula helps combat halitosis by targeting odor-causing bacteria and reducing volatile sulfur compounds for fresher breath and long-term oral health. Enhanced with K50 HerbaVS 2, it offers anti-plaque action, gum protection, and support against bleeding gums.
