

OQEMA

Technical Applications Portfolio

GROUP Technical Applications

For more than 100 years we have found success in being one of the leading global players in the chemical distribution market, built on strong, long-lasting relations with both our suppliers and customers. We are proud to have numerous well-known suppliers entrusting us with the distribution of their high-quality products. Since OQEMA's founding in 1922, we have served as an interface between chemical manufacturers and the chemical processing industry.

With close to 1,600 employees throughout 26 European countries, we can provide a full service along the supply chain, including procurement, product development, individual mixing, logistics and manufacturing. OQEMA offers a highly dynamic and continuously expanding product portfolio of more than 15,000 products.

Our inorganics portfolio

Inorganic chemicals are one of OQEMA's cornerstone markets, covering a huge scope of products from formic acid to citric acid solutions.

SOLID AND LIQUID COMMODITY CHEMICALS

In addition to all commodity chemicals such as acids (including hydrochloric acid, nitric acid, sulphuric acid and so on) and bases (sodium hydroxide, lye, etc.) as well as nitrates, persulfates, phosphates, sulphates, peroxides and many more, we also guarantee you reliable stock levels, fast delivery and flexibility thanks to our many regional warehouses.

We have long-standing partnerships with well-known global producers, some of which involve OQEMA being the exclusive marketer for various products.

ADBLUE®

Using AdBlue® reduces nitrogen oxide (NOx) emissions from diesel engines considerably and makes a great contribution to environmental protection, which we actively support. There are highly regarded producers who entrust us with the distribution of their products. Whether the goods are provided bulk or packaged, we always deliver in product-specific containers using our own vehicle fleet.

Simultaneously, we provide support for all matters relating to the product or the construction of storage facilities and piping, offering our technical expertise and broad wealth of experience.

ULTRA-PURE ELECTRONIC CHEMICALS

OQEMA specialises in the distribution of ultra-pure chemicals for the photovoltaic, electronics and semiconductor industries, whatever the level of quality – even into the ppt range.

Our product palette consists of solvents, alkaline solutions and acids as well as etchant formulations, supplied in various container sizes from 2.5 litre bottles to ISO/TC freight containers, and covers a variety of processes in the aforementioned industries. Having our own clean-room dispensing cabinet at our Leipzig site along with our extensive product and container portfolio means that we have the best equipment possible for serving our customers in this sector.

Our large containers feature a withdrawal system which is customary for the industry so that you can withdraw the contents safely while maintaining their quality.

WATER CHEMISTRY

We use our long-standing expertise in water treatment products and applications to support our customers with local government policies or industrial compliance, as well as with swimming pool technology. Our product portfolio contains all products needed for this field, right down to chloric gas.

Our inorganics portfolio

The OQEMA Group's inorganics portfolio

You can profit from our many years of experience, speed, commitment and great flexibility.

Our business

The OQEMA Group is one of Europe's leading chemicals distributors. We have many years of experience and are quick, committed and – most importantly – flexible. Our extensive expertise acts as a basis for dependable partnerships.

Our two business models – classic distribution and contract business – combined with our broad portfolio of client services distinguish us significantly from other players in the market.

We use this competitive advantage to offer our clients individual solutions that are tailored to perfection.

Our organics portfolio

Technical Applications

OQEMA is an established distributor in the field of Technical Applications. We are proud of our long-standing partnerships with numerous renowned suppliers. These partnerships guarantee a high level of delivery reliability and the best product quality.

BASF

BASF manufactures around 600 products in the Intermediates division. These include amines, acids, solvents, etc. They are often manufactured in multi-stage production processes within BASF. They are typically used as intermediates for downstream chemicals.

AMINES

With around 300 different amines, BASF has the world's most diverse portfolio of chemical intermediates of this kind. The versatile products are mainly used in the production of process chemicals, pharmaceuticals and in the agricultural sector. They are also applied in cosmetic products, detergents as well as in coatings, plastics and fibres.

Products	CAS
Standard Amines	
Benzylamine	100-46-9
Butylamine	109-73-9
Diethylamin	109-89-7
Dimethylacetamide	127-19-5
Dimethylethanolamine	108-01-0
Ethylenediamine	107-15-3
Triethylamine anhydrous	121-44-8
Ethanolamines	
Diethanolamine	111-42-2
Monoethanolamine	141-43-5
Triethanolamine	102-71-6
Various solutions are available.	
Specialities	
1,4 Dioxane stab.	123-91-1
1-Vinylimidazole	1072-63-5
2-Mercaptoethanol	60-24-2
2-Methylimidazole flakes	693-98-1

Speciality Amines

2-(2-Aminoethoxy)ethanol	123-91-1
2-Ethylhexylamine	104-75-6
3-Methoxypropylamine (MOPA)	5332-73-0
Diethylethanolamin (DEEOA)	100-37-8
Ethylene Urea	120-93-4
Methyldiethanolamine	105-59-9
Morpholin	110-91-8
N-Formylmorpholin	4394-85-8

CARBOXYLIC ACIDS

BASF is the world's leading manufacturer of carboxylic acids. These are used as auxiliaries for textile and leather applications and as de-icing agents. Higher carboxylic acids such as 2-ethylhexanoic acid and isononanoic acid are mainly used in synthetic lubricants, paint driers and PVC plasticisers.

Products	CAS
2-Ethylhexanoic acid	149-57-5
Formic acid 99/100%	64-18-6
Isononanoic acid	3302-10-1
Propionic acid	79-09-4

POLYAMIDES

BASF is the only company worldwide to offer both polyamide 6 and polyamide 6.6 polymers and their intermediates. The production sites are Ludwigshafen and Antwerp.

Products	CAS
Adipic acid	124-04-9
Caprolactam tabl.	105-60-2

BORSOD CHEMIE

Raw materials for producers of PU, rubber, lubricants, agricultural products, foundry auxiliaries, etc.

Products	CAS
Dicyclohexylamine (DCHA)	101-83-7
Dimethylisopropylamine DMIPA	996-35-0
N-methyldicyclohexylamine (MDCHA)	7560-83-0
Other intermediate products	
Gamma butyrolactone (GBL)	96-48-0
N-methylpyrrolidone (NMP)	872-50-4
N-ethyl-2-pyrrolidone (NEP)	2687-91-4
Tetrahydrofuran (THF)	109-99-9

EVONIK SILICA

Evonik is the only manufacturer worldwide to have both fumed and precipitated silica in its product range.

Fumed silica

AEROSIL® Series	The AEROSIL® portfolio covers a very wide range of surface areas, so the areas of application are extremely broad.
-----------------	--

Precipitated silica

SIPERNAT® und ZEOFREE® Series	SIPERNAT® and ZEOFREE® products are used as anti-caking agents, carriers, stabilisers, defoamers, rheology control agents, microplastic substitutes and in many other areas.
-------------------------------	--

HYWAX PARAFFINE

Hywax offers an extensive product portfolio of paraffins, microcrystalline and synthetic Fischer-Tropsch waxes, vaselines as well as blends and emulsions. The applications are diverse: adhesives, polymer processing, coatings, rubber, tyres, paper, packaging, textiles, road construction, candle and many more.

Products	CAS
Hydrowax Wax Dispersions	Hydrowax
Candle dipping mass	KTM
Tyre wax	Varazon
Micro wax	Hywax
Synthetic waxes	Hywax
Paraffin wax	Hywax
Vaseline pharmaceutical and technical	Merkur® und Vara®

WHITE MINERAL OILS

We offer a full range of white mineral oils in a variety of viscosity grades and certifications to meet the requirements in your application.

Products	Viscosity kin. 40°C in mm²/s	CAS
White mineral oil QQAPI M 15 PB Pharma	8,5 - 11,0	8042-47-5
White mineral oil QQAPI M 40 PB Pharma	14-0 - 18,5	8042-47-5
White mineral oil QQAPI M 50 PB Pharma	20,6 - 24,0	8042-47-5
White mineral oil QQAPI M 240 PB Pharma	62,0 - 75,0	8042-47-5
White mineral oil technical grade type 15	8,5 - 11,0	8042-47-5
White mineral oil technical grade type 17	14,0 - 18,5	8042-47-5
White mineral oil technical grade type 30	30-0 - 36,0	8042-47-5
White mineral oil technical grade type 67	62,0 - 75,0	8042-47-5

ITALMATCH

Phosphonate and polymer chemicals are the basis of many state-of-the-art water treatment formulations. Italmatch is considered one of the world's leading manufacturers of water treatment additives.

Phosphonates and Polymeres

Dequest®
Turpinal®
Belclene®
Dequest®

LANXESS ADVANCED INDUSTRIAL INTERMEDIATES

The focus here is on aromatic compounds and their derivatives. Also included are benzyl products based on the aromatic toluene and polyols such as TMP and hexanediol.

Products	CAS
Chlorobenzene	109-90-7
1,6 Hexanediol	629-11-8
m-Cresol pure	109-39-4
o-Chlortoluene 99%	95-49-8
o-Cresol pure	95-48-7
o-Toluidine	95-53-4
Trimethylolpropane TMP	77-99-6

LEUNA-HARZE GMBH

Under the brand name Epilox®, LEUNA-Harze GmbH offers its customers a comprehensive range of epoxy resins, reactive diluents and hardeners that are suitable for a wide variety of applications.

Epilox® Epoxy resins

solid and liquid resins, modified and nonmodified

Epilox® Diluents

Epilox® Hardeners

Epoxy-amine adducts and blends

Polyaminoamide hardeners

Pure amines

Waterborne hardeners

DR. PAUL LOHMANN

With the Lohstragon® brand, Dr Paul Lohmann has an extensive portfolio of metal salts.

Ca, K, Al, Zn, Fe, Mg, Na, Mn,...

Oxalates, sulphates, carbonates, acetates, oxides, hydroxides, tartrates,...

FATTY ACIDS PACIFIC OLEO

Pacific Oleochemicals Sdn Bhd has been one of the leading manufacturers of oleochemicals since the early 1980s. It uses natural and renewable raw materials derived from vegetable oils in a modern state-of-the-art plant.

type of fatty acid

Oleic acid

Kortacid 1811, 1812 Palm oil and palm kernel oil

Distilled fatty acids

Kortacid C70, PK50; distilled coconut oil, palm, palm kernel, S15, PZ05, C70H, hydrogenated material PKGH

Fractionated fatty acids

Kortacid 0699 Caproic acid

Kortacid 0899 Caprylic acid

Kortacid 1099 Capric acid

Kortacid 1299 Lauric acid

Kortacid 1499 Myristic acid

Kortacid 1698 Palmitic acid

Kortacid 1895-1899 Stearic acid

SACHTLEBEN

We distribute barytes and fluorites from Sachtleben Minerals.

Albawhite	White barytes with high brightness, a low yellow tint and colour neutrality. For use in paints and varnishes, floor coatings, pigment preparations, fillers, adhesives, glass, polishes and many more.
Albasoft	
EWO-powder	

Fleur

Schwerspat	Off-colour barytes are alternatives for applications where colour is not so critical, e.g. in sound insulation, friction and clutch linings, sealing compounds, adhesives, paints and varnishes.
Barytmehl	

SOLVAY PHENOLIC INTERMEDIATES

Organic molecules produced by the controlled oxidation of phenol. These products fully meet the specific requirements of the agrochemicals, pharmaceuticals and monomer inhibitors markets.

Products	CAS
Anisole	100-66-3
Catechol	120-80-9
Cyclopentanone	120-92-3

OQEMA in all of Europe

Formed in 1922, the OQEMA Group has consistently developed. For the last 25 years our growth throughout Europe and the rest of the world has resulted in us becoming one of the leading global chemical distributors. Our pioneering spirit and entrepreneurial approach has resulted in refined sourcing capabilities and market expertise. Our strategic supply network ensures that we are there where you need us, when you need us! Welcome to our world!

We have been growing constantly and are present in whole Europe – close to our customers and ready to serve their needs.
