

TROPICAL GLOW FROSTING

Humectant oil

A moisturizing oil is a hair care product specifically formulated to deeply nourish and hydrate hair. This type of product is generally used as part of a technique called humectation, in which oil is applied to the hair and scalp and left for a period of time to provide intensive hydration, as well as repair and treatment.

Fase	Ingrediente	% w/w
A	Vitamin E	0,5
A	Propylene Glycol Dibenzoate	1,0
A	HYALURONIC TUCUMA EXTRA (<i>Astrocaryum vulgare seed butter</i>)	2,5
A	HAIRVIVAL MURUMURU (<i>Astrocaryum Murumuru Seed Butter</i>)	5,0
A	Triheptanoin (and) C13-16 Isoalkane	0,5
A	ÓLEO DE BABAÇU (<i>Orbignya oleifera seed oil</i>)	qsp
A	Glyceryl Caprylate (and) Glyceryl Undecylenate	20,0
A	Fragrance	q.s.

Procedure:

Weigh the ingredients and heat the system to 80°C with slow stirring until the ingredients are completely melted.

Then stop heating and place in the desired packaging.

How to use:

Apply the Moisturizing Oil strand by strand, covering the length and massaging the scalp to activate circulation. You can leave it on for 30 minutes or moisturize it at night. To facilitate removal, with the oil still on the hair, apply your preferred conditioner strand by strand and let it act for 5 minutes. Then wash and moisturize your hair as usual.
